

Solutions for:

- Revenue Cycle Management
- Patient Access Management
- Business Office

e ADMIT

It's a matter of fact:

Transitioning to electronic admissions will save hospitals significant hard costs.

Solve Patient Access top challenges:

- Joint Commission compliance audits
- Speed up registrations – up to 30 percent
- Reduce fraud with patient picture functionality

eAdmit Patient Admissions Solution

Trusted by the largest hospitals in America since 2002, PDS delivers more than one million compliant patient admissions every month. The eAdmit workflow solution automates the delivery and processing of patient consents and acknowledgments. eAdmit integrates with the hospital's information system to produce compliant patient and point-of-service-specific form sets.

- Inpatient and outpatient consents
- Multiple language support
- Labels, armbands, and barcodes
- Advance directives, notice of privacy practice, and patient rights
- Point-of-service assessments
- Questionnaires and Acknowledgments

Paperless Registration Workflow & Records Management

PDS delivers on-screen form presentation utilizing digital signature capture tools and ID card scanning to speed up the patient registration. Compatible with Main admissions, ED bedside and Outpatient areas, PDS has the tailored options to provide easy-to-use signing and capture functionality to allow a speedy and accurate registration. Registration concludes with a one-touch send to EMR of all documents and card images. Management can monitor and receive daily reports on all signed/unsigned forms by admitted patient with the QA monitor.

Break the barriers of the old way of handling forms:

- Eliminate paper and all of its inefficiencies
- No paper copying/scanning/courier of forms to Business Office/HIM
- Delayed access to electronic records

Downtime and Emergency Operation Plan

Delivering superior solutions for healthcare extends beyond the normal parameters of environmental assumptions. PDS eAdmit solution offers multiple layers of disaster recovery to ensure compliant delivery of patient care in the most adverse conditions.

Benefits

- Eliminates preprint soft cost, waste and label application
- Drives standardization
- Transparent to current HIS/registration system
- Multiple language support
- Downtime process
- Provides continued HIPAA and joint commission compliance
- Produces multiple barcode formats
- Enhances workflow
- Eliminates antiquated embossers
- Instantaneous updates
- Digital signature capture
- Electronic patient record index and management

The PDS Difference

PAY FOR PERFORMANCE – The PDS service delivery model requires consistent delivery of high quality service over the life of the engagement. Unlike typical software acquisitions in which you are tied to your decision regardless of the overall results, our managed services model minimizes the risk exposure associated with large capital purchases. We work with organizations to gain user acceptance by providing ongoing product support for one single monthly payment. PDS' interest is aligned with our clients to maximize user acceptance. We achieve this through providing superior customer service each and every month.

About the Company

Precision Document Solutions, Inc., established in 1996, provides document workflow and print management solutions to healthcare providers throughout the United States. A number of the largest providers have benefited from our solutions and consider PDS to be a valued partner. PDS' solutions and managed services deliver e-forms automation, paperless registration with digital signature capture, clinical documentation and physician order management to provide streamlined workflow, joint commission and HIPAA compliance, and patient safety.

Print Management and eSolutions Suite from Precision Document Solutions

eDemand

eDemand automates the creation and distribution of all patient care forms and documentation. We work closely with you to create a full set of electronic clinical forms that reflect your care quality standards and all compliance requirements. eDemand provides rapid and accurate collection, analysis and distribution of patient data, eliminating the time and resources wasted by cumbersome manual filing systems.

pFax

pFax automates inbound and outbound enterprise fax operations in the areas of central scheduling, clinical reporting, and HIM records requests. pFax takes intelligent fax services to the next level of professionalism for the hospital to promote physician satisfaction, paper reduction, fax routing and reporting functionality.

Medicare Assessments

Hospitals can lose up to 50 percent of Medicare revenues due to noncompliance. Precision eliminates these concerns by building compliance requirements right into the system.

Professional Services

Engage PDS for a document workflow assessment or technology feasibility in areas of Patient Access, Central Scheduling, Clinical Documentation, HIM records management – EMR readiness, pharmacy order workflow, and fax management.

eSolutions

Precision's complete suite of eSolutions can automate your entire organization assuring compliance and cost savings of 30 to 55 percent. Eliminate costly preprinted paper forms:

- 100 percent compliance
- No obsolete forms
- No upfront capital expenditures
- No hidden costs or fees
- We handle maintenance, service, updates and help calls

pScript

pScript provides order automation from the hospital nursing units and service areas to the pharmacy as a downtime option to CPOE or replacement of fax orders. Pharmacy and nursing communication increases and real-time order status minimizes calling and confusion with the interface to the patient record and order entry systems deployed in the hospitals.

Print Management

Businesses spend between 1 and 3 percent of total revenue on printing. With PDS managed print solutions, we consolidate all operational costs including supplies, maintenance, parts and labor to help you save. Our goal is to help you best leverage your current printing fleet. There are no lease payments and no surprises. We manage and we measure, and give you the data necessary to make informed decisions that lead to savings. There's no upfront capital expenditure. Your cost is based solely on the number of pages you print.
